COMPANY PROFILE

Founded in 1966, New England Stone is one of the largest stone companies in the United States. The corporate headquarters and fabrication plant are located in the Quonset Point Port in Rhode Island while affiliate quarry, Granites of America, has ten domestic quarry locations. In addition to these granites, New England Stone networks with numerous stone quarries in which the finest of all stone types are procured.

The company specializes in Dimensional Stone products but also has Paving and Cobblestone, Curbing, Slab, Bronze and Memorial product Divisions.

New England Stone has been in the forefront in developing new ways to fabricate stone and continually purchases new technology and equipment to cater to the fabrication needs of each individual project.

PRINCIPLES: Craig A. C. Reynolds,
President

Donald C. Conte, PE,
Chief Operating Officer

Charles H. Flaum, CPA,
Chief Financial Officer

MEMBERS: Building Stone Institute
Marble Institute of America
National Building Granite Quarries Assoc.

*Our goal is to strengthen the awareness of the
many qualities of stone and to promote its use
in both private and commercial projects.*

of technology in the stone industry.*

OUR SERVICES

Our expert Sales Team is available to assist with stone selection and technical guidance from the start and is happy to work with clients in creating mock-ups to ensure total satisfaction. Estimators are qualified to turn around pricing for budgets and official bids quickly and easily.

New England Stone is constantly incorporating the latest tools and software in engineering, project management, and fabrication. The drafting department can work from most any format including, dwg, dxf, tiff, and jpeg. Shop drawings and shop tickets are all 100% CAD produced, giving customers access to the same CAD files that are used to generate full size shop patterns, and CNC tool paths.

Our stone cutters, who take pride in their workmanship, are of the most qualified and dedicated in the world. Many are expert carvers while each is qualified to craft their portion independently and quickly. Since the Dimensional Stone Division is strategically situated in The Quonset Point Industrial Park, it has port, rail and immediate highway access. This provides New England Stone the capability to bring in oversize blocks for large and distinctive works without difficulty. With logistics mainstreamed, projects are easily expedited while shipping is carefully coordinated between the customer and Project Manager.

From concept/design, materials selection/procurement, drafting, fabrication to shipping, New England Stone is prepared every step of the way and because much of the stone that is worked comes from Granites of America, we can provide single-source control.
